THE

ELECTRICAL WORLD

A REVIEW OF CURRENT PROGRESS IN ELECTRICITY
AND ITS PRACTICAL APPLICATIONS

VOLUME LIX

JANUARY 1 TO JUNE 30, 1912

NEW YORK

ELECTRICAL WORLD

INDEX TO VOLUME LIX

GENERAL INDEX

Entries from the Digest of Current Electrical Literature are indicated by D (Digest) and D R (Digest Reference)

A

Accounting:
——Reports of N. E. L. A., 1369
——Uniform system in New York state, 1009
Advertising by central stations:
——Baltimore's House Electric, *364
——Boston, *754
——Chicago electric vehicle promotion, *594
——Cleveland display rooms, 975, 977
——Dayton, Ohio, *908
——Eugene, Ore., *257
——Fan-time reminders, 907, *1072
——Fort Wayne, Ind., 1391
——Los Angeles, Cal., 974
——Moving-picture films, Chippewa Falls, Wis., 416
——St. Louis, One-line advertisement, *102
Agricultural communities, Electricity in:
——Dakota farm, *485
——Derenburg, Germany. By K. Pietzsch, (D.) 555
——Difficulties. By Holldack, (D.) 814
——Discussion at Iowa Electrical Association, 944
——English country districts (D.) 1319
——Financial results. By H. Büggeln (D. R.) 1078
——Fort Wayne, Ind., 1120
——Noblesville, Ind., Farm service near, 803
——Notes, 230
——Plauen, in Saxony. By F. Huber, (D.) 493
——Report of N. E. L. A., 1362
——Service in rural districts. By G. D. Slaymaker, 1418
——Transformer stations, Portable and stationary in Germany, *326
Air compressor, Gould's motor-driven, *1449
Allis-Chalmers Company, Future of, 176
Alpha particles:
——Ranges of. By Geiger and Neuttall, (D.) 765
——Scattering of. By Geiger, (D.) 556
Alpha rays from polonium, Secondary rays excited by. By V. E. Pound, (D.) 1220
Alpha rays, Ionization. By N. Campbell, (D.) 915
Alternating-current development in America. By W. Stanley, (D.) 1397
Alternating-current vector diagrams, Use of. By C. C. Hawkins, (D.) 765.
Alternating-current waves, Analysis of. By Pichelmayer and Schrutka, (D.) 602
Alternators. (See Generators.)
Aluminum:
——Expansion coefficient. By F. J. Brislee, (D.) 206
——Manufacturing interest and the Government, 670, 1099, 1292
——Production in the world. By G. Flusin, (D. R.) 863
Aluminum conductors. By Arthur Jacob, 1077
——High-tension conductors and the Calgary plant. By C. B. Smith, 107; Comment, 77
Aluminum for magnet winding, 32
American Electrochemical Society, 939, 1010; Boston meeting, 1054
American Institute of Electrical Engineers:
——Annual meeting, 1050, 1098
——Boston convention, 1292, 1415
——Code of professional conduct, 576, 832
——February meeting, 340
——Honorary members, 180, 723
——May meeting, 1002
——Meetings, various, 722
——Membership New grade, 179
——Minnesota section, 670
——Notes, 575, 787 1146
——Panama trip, 177
——Pittsburgh meeting, 939
——Pittsburgh section, 392
——Portland meeting, 1006
——Protection of transmission circuits and apparatus, Discussions, 726
——Schenectady meeting, 1101
——Secretary F. L. Hutchinson, 128
American Railway Engineering Association, 730
American Society of Mechanical Engineers, Honorary member, Dr. Rudolph Diesel, 934
American Telephone & Telegraph Co., Annual report, 671
Ammeter and tension indicator, (D.) 915
Ammeter, Hot-wire, for high-frequency currents. By J. Reyval, (D.) *1320, *1397; A. H. Taylor, (D.) *1447
Anemometer, Electric recording. By R. Chasseriand, (D.) 268
Apartment house, Complete electrical equipment, Louisville, Ky., 102
Arc-lamp support, Temporary, on Equitable Building site, *131
Arc lamps:
——Beck improved, (D. R.) 370
——Electrodes, Conradty patent, (D.) 58
——Electrodes, Economical use of. By W. Vieweger, (D.) 1031
——Flame:
Economy of. By W. Heckler, (D.) *812, 1272, 1395
Long-burning enclosed. By C. E. Stephens, (D.) 1445
Series metallic, Westinghouse, *1082
Street lighting. By Hurley and Padon, (D. R.) 1445
Yellow. By M. Solomon, (D.) *1126
——Headlight, Westinghouse metallic-flame, *160
——New lamps, (D.) 1218
——Progress in construction, (D.) 1031, 1272
——Series arc, Turin Exhibition. By A. Hess, (D.) 266
Argentina. Import and export trade. By L. J. Seidler, (D.) 558, 601
Arkansas Association of Public Utility Operators, 1155
Armature and coil testing sets, Westinghouse, *428
Armature disk notcher, Ferracute, *496
Asbestos purification, (D.) 1081
Ashes removed by drag-chain elevator. By C. Jones, *969
Astronomical research work, Electricity in. By H. S. Knowlton, *633; Comment, 669
Atomic theory of electricity. By K. A. Millikan, (D.) 1447
Auto-transformer distribution, Kesselring patent, (D.) 493
Auto-transformer for metallic-filament lamps, *325
Automobile business of central stations:
——Boston Edison Co.'s campaign, *738, 740. *754, 1071
——Brooklyn garage, *744
——Central stations throughout the United States using electric vehicles, Table, 1214
——Collection of data proposed, 755
——Columbus, Ohio, 753
——Dayton, Ohio, 753
——Denver, Colo., 362, 1210
——Detroit, Trucks in use, 755
——Erie, Pa., 149
——Louisville, Ky., 975, 1264
——Lowell, Mass., *851
——Operating experience at Rochester. Systems of inspection and forms of report, 743
——Report of N. E. L. A., 1361
——Research work at Massachusetts Institute of Technology, 740; Comment, 719
——Small central station, 718
——Woman representative, Boston, *753
Automobile lamps, Electric, *162, *760. *772
Automobile show, New York City, 81, 161
Automobiles, Electric:
——Central stations in the United States using, 1214
——Charging batteries, Multi-voltage system. By J. F. Lincoln, 725
——Comparative cost data for electric and horse-drawn vehicles, 362, 724
——Comparative cost data of electric, gasoline and horse-drawn trucks. By S. H. Conkey, 756
——Comparative costs of operating electric, gasoline and horse vehicles, Research at Massachusetts Institute of Technology, 740, 1068; Comment, 719
——Cost of operating trucks, 257
——Data from Chicago, 1073
——Delivery costs, Cleveland, 482
——Delivery wagon, M. & P., 373
——Delivery wagons of United Electric Light & Power Co., New York, *977
——Delivery service, Reliability and operating costs, 885
Automobiles, Electric: (Continued)
——Fire truck, Gorman, *754
——General Motor Truck Co., *918
——Lighting. By A. Soulier, (D.) 650
Carbon and metallic-filament lamps, *772
Cleveland, *760
General Electric lamps, *162
——Oklahoma City, 149
——Omnibuses, Field, in Chicago, *210
——Pilot cell. By R. Macrae, *429
——Progress of 1911, 11
——Relative reliability of electric and gasoline, 293
——Repair wagons, Dayton, *760
——Speed standardization, 446
——Status and future possibilities, 885
——Truck for farm service, General Motors Co., *1322
——Weatherproofing of battery boxes. By L. G. Clancy, *748
——Woods, Performance of, 753
Automobiles, Gasoline:
——Comparative cost data of electric, gasoline and horse-drawn vehicles, 719, 740, 756, 1068
——Relative reliability of electric and gasoline, 293
Automobiles, Gasoline-electric omnibuses. By Macfarlane and Burge, (D.) 650

B

Baggage truck, Motor-operated, Boston terminal, *468
Baking, Electric:
——Milwaukee, *50
——Springfield, Ohio, Energy consumption, 692
Ball bearings, Use of in generators and motors (D. R.) 155
Baltimore's House Electric, *364
Bank for electrical undertakings, Berlin. By C. Ergang, (D.) 1448
Bed, Electrically equipped, Fanner, *988
Bell telephone companies, Independents seek to have Government bring suit against, 129
Blast-furnace gas plants. By A. Witz, (D. R.) 981
Blowers, Motor-driven, Horning, *1324
Boiler development of 1911, 21
Boiler efficiencies, Record, obtained by improved baffling, Detroit, 645
Boiler plants. By Guillaume and Turin, (D.) 699
Boiler room economy. By N. Reinicker, 1419
Boiler settings, Defective. By J. F. Hobart, *476
Boiler water-level alarm, Rennert, *61
Bolt, Expansion, Van Antwerp, *917
Book reviews:
——Alternating-current Design. By J. Frith, 1034
——Annuaire du Bureau des Longitudes, 815
——Arc Lamps and Accessory Apparatus. By J. H. Johnson, 1081
——Calcul et Construction des Alternateurs. By Henri Birven. 1130. 1397
——Care of Automobiles. By R. E. Sherwood, 372
——Central-station Heating. By B. T. Gifford, 494
——Centrifugal Pumping Machinery. By C. G. de Laval, 1221
——Centrifugal Pumps. By L. C. Loewenstein and C. P. Crissey, 59
——Corrosion of Iron and Steel. By J. N. Friend, 766
——Costruzione delle Linee Elettriche Aeree. By I. Brunelli, 1321
——Design of Electrical Machinery. By W. T. Ryan, 1130
——Direct and Alternating Current Manual. By Frederick Bedell, 702
——Earning Power of Railroads, 1912, 1130
——Edison. Tobb Forrasmunka Alapjan. By Balla Ignac, 984
——Electric Circuit. By V. Karapetoff, 916
——Electric Cranes. By H. H. Broughton, 1221
——Electric Discharges, Waves and Impulses. By C. P. Steinmetz, 984, 1448
——Electric Railway Engineering. By C. F. Harding, 323, 916
——Electric Traction for Railway Trains. By E. P. Burch, 427

*Indicates illustrated articles.

242321

Book reviews: (Continued)
——Electricity in Locomotion. By A. G. Whyte, 603
——Elektrochemische Uniformer. By Johannes Zacharias, 372
——Elektrotechnik in Einzel-Darstellungen. By Dr. G. Benischke, 558
——Elementary Introduction to the Experimental Study of Frictional Electricity. By K. H. Reichaus, 110
——Good Engineering Literature. By Harwood Frost, 323
——Handbook of Wireless Telegraphy. By J. E. Murray, 1130
——House Wiring. By T. W. Poppe, 1221
——Induction Motor. By B. F. Bailey, 1034
——Laboratory Exercises in Physical Chemistry. By J. N. Pring, 1397
——Lampes Electriques. By J. Escard, 652
——Magnetic Circuit. By V. Karapetoff, 1034
——Measurement of High Temperatures. By G. K. Burgess and H. Le Chatelier, 1130
——Modern American Telephony. By A. B. Smith, 1081
——Power House Design. By J. F. C. Snell, 1321
——Principes de la Technique de l'Eclairage. By L. Bloch, 603
——Principles of Alternating Current.s By J. L. Bearer, 1081
——Principles and Practice of Electric Wiring. By A. Bursill, 916
——Principles of Electrical Engineering. By Harold Pender, 864
——Progress of Physics. By Arthur Schuster, 702
——Qualitative Analysis. By A. E. Hill, 1321
——Ship Wiring and Fitting. By T. M. Johnson, 984
——Signal Dictionary, 1081
——Steam Power Plants. By H. C. Meyer, Jr., 1221
——Straight Line Engineering Diagrams. By Manifold and Poole, 268
——Telegraphic Sans Fil. By J. Zenneck, 1448
——Telephony. By S. G. McMeen and K. B. Miller, 558
——Testing of Electrical Machinery. By J. H. Morecraft and F. W. Hehre, 652
——Théorie Corpusculaire de L'Electricité. By Paul Drumaux, 427
——Theorie der Wechselstrome. By Ernest Orlich, 1081
——Transformers. By H. Bohle and D. Robinson, 1130
——Twelve Principles of Efficiency. By H. Emerson, 1221
——Valuation of Public Utility Properties. By Henry Floy, 1275
——Wechselstromversuche. By Anton Lampa, 1034
——Wireless Hook-ups. By H. Gernsback, 268
Bookkeeping, Voucher system, Albert Lea, Minn., 1441
Booster converter, Westinghouse, Synchronous, *1132
Boosters:
——Automatic protective features, Detroit, 846
——Experiments, with Pirani and Lancashire types of booster systems. By L. Schroeder, (D.) 109
——Reversible and storage batteries in traction plants. By C. Turnbull (D. R.), 764
Boston:
——Cambridge subway opened, 670
——Co-operative Information Bureau, 135
——Electric Show, 445, 561, 655
——Electric vehicle campaign, *738, 740, *754
——Electric Vehicle Club, 80, 129, 293, 342, 392, 525, 577, 738, 886, 938
——Engineers' Club, 128
——Garage, Electric, proposed, 80
——Motor application exhibit, 919
——Motor truck hearing, 343
Brake, Prony. By E. W. Henderson, (D. R.) 1447
Braking, Electric. By Niethammer and Siegel, (D.) 267.
Braking of induction motors. By H. C. Specht, 941
Braking of single-phase repulsion motors, (D.) 913
Brass melting by electricity, 747
Brazil. By Best and Parrott, (D.) 58
Bridge, electrically-operated swing-span, Black Rock, N. Y., *1322
Briquetting plants, Electric power for, (D. R.) 699
British Institution of Electrical Engineers, (D.) 1321
British National Physical Laboratory, Report for 1911, (D.), 494, 863, 915; comment, 1096
Brushes, Carbon:
——English patent, (D.) 1218
——Neutral line of. By L. Verain, (D.) 58
——Testing and manufacturing. By W. R. Whitney, (D.) 650
Bryant Electric Company's testing laboratory, *606
Buildings of Prudential Insurance Company (See Prudential)
Busbar equipment, Prudential Insurance Company, Newark, N. J., *143
Bushings, Porcelain, American, *61
Byllesby convention, 32, 82, 83

C

Cable clamps:
——Application of Matthews, *865
——Fairmount porcelain, *1226
Cables:
——Aluminum high-tension, Calgary plant. By C. B. Smith, 107; comment, 77.
——Armored, British patent, (D.) 556
——Calculating networks, machine for. By J. Nowak, (D.) 558
——Capacity of three-phase, three-core cables. By A. B. Clark, (D.) 916.
——Fault localization. By H. W. Jowers, (D. R.) 110
——Fault localization on mining cables. By G. B. Burrows, (D.) *1129
——Fault localizations in telephone cables. By E. Giersing, (P.) 603
——Feeder protection. By R. Colwettes, (D. R.) 765
——Flexible, British patent, (D.) 651
——Frost and telegraph cables, (D.) 651
——German standardization rules for insulated conductors, (D.) 1395
——Insulation theory. By Michard, (D.) 1219
——Measuring effective capacity of high-tension. By Stewart and Terwilliger, (D.) 493
——Ontario transmission system, 98
——Progress in manufacture. By L. Lichtenstein, (D. R.) 765
——Rating of. By J. Wagner, (D.) 1466
——Regulations of German and British associations. By James Wagner, (D.) 1273
——Safe pulling-in stresses, 487
——Submarine cable calculations. By R. Appleyard, (D.) 110
——Supporting cables in vertical runs. By C. L. Wilson, *253
——Testing high-tension. By A. Léauté, (D.) 493; W. Genkin, (D. R.) 1221
——Testing high-tension cables in water. By V. Planer, (D.) 206
——Underground-cable ducts, Houston, Tex., *1442
——(See also Telegraph cables; Telephone cables; Wires and wiring.)
Calibration of instruments by means of the spark-gap. By R. P. Clarkson, *1307
California Commission news, 348, 679, 1013
Calorimeter, Féry thermo-electric combustion, (D.) *1274
Canadian Conservation Commission, 178
Canadian Electrical Association, 1292, 1420
Capacities, Comparing, at various frequencies. By A. Campbell, (D.) 983
Capillary Filaments, Making. By H. S. Souttar, (P.) 916
Carborundum, Stratification and capacity of. By Pierce and Evans, (D.) 862
Cathode rays, Helix of. By C. T. Knipp, (D.) 602
Catskill Aqueduct, Use of electricity, *463
Cementite, Magnetic transition, Temperature of. By Smith and Barker, (D.) 558
Central-station business:
——Adrian, Mich., Soliciting with electric vehicle, 753
——Automobiles. (See Automobile business)
——Billing and receipting with post cards, Topeka, 1440
——Blower, Motor-driven, with crude oil, replaces gas furnace, 548
——Bookkeeping, Voucher system, Albert Lea, Minn., 1441
——Boston, Welcoming service criticisms, 594
——Brooklyn, New contracts, 1313
——Cemetery, Motor load in, Pueblo, Col., 1439
——Cleveland situation, 130
——Colorado, Northern Colorado Power Co., 1439
——Complaints, Handling:
Boston, 854
Milwaukee, 1312
——Contract form for diversified service, Newark, Ohio, 974
——Contract forms and agreements with local distribution companies. By D. L. Gaskill, 962
——Contract routine. By R. T. Duncan, 1417
——Contractors. (See Contractors, Electrical)
——Co-operation between central station and isolated heating plant, 314
——Co-operation between central stations and municipalities, 362
——Courteous treatment due the public, 101
——Customer gets acquainted with plant, Stamford, Texas, 1439
——Customer who forgets to bring his bill, 101
——Customers with a "kick," Handling, 418
——Demonstrator, Selecting a woman, 314
——Detroit, Growth, 198
——Detroit winter business, 643
——Discounts and delinquencies, Handling, at Fond du Lac, Wis., 314
——Establishing distribution system in a rural district. Form of contract and agreements with local distribution companies. By D. L. Gaskill, 962
——Fitchburg, Mass., Cutting down a peak load, 1209
——Flat irons:
Comparison of gas and electric in Rochester factory, 53
Window display, Mobile, Ala., *416
——Fort Wayne, Ind., 974
Central-station business: (Continued)
——Free energy for one year for new customers, tried in Germany and Sweden, 418
——Gothenburg, Sweden, Method of encouraging use of electric light. By E. Wikander, (D.) 155
——Greenville, Ohio, Supplying energy to ten towns. By D. L. Gaskill, 962
——Home distribution companies in towns nearby, 909
——House-wiring campaigns:
Cleveland, 692
Kansas City, 975
Letting customer estimate cost of wiring, *50
Pittsburgh, 976
Wichita, Kan., 1025
——Ice-making. (See Refrigeration)
——Increasing sales of energy. Report before Berlin Electrical Society. By E. Wikander, (D.) 861, 1079
——Inspection, Annual efficiency, Minneapolis, 150
——Inspection, Daily, of heating installations, 101
——Kansas City, Year's house-wiring campaign, 975
——Kansas small towns, *855
——Lamp renewals, Free delivery of. By G. J. Kirchgasser, 595
——Load-factor and power-factor—How to improve them. By L. L. Elden, 675
——Load factors—railway, ice-making and other loads. By E. F. Tweedy, 258
——Louisville, Ky., 257, 692, 1120, 1209
——Maintenance of lighting equipment, Knoxville, Tenn. By W. Harrison, 317
——Mangum, Okla., 479
——Marion, Ind., Flat-rate controller campaign, 1120
——Meter-dial paper weight, 1440
——Milwaukee, Result of ten months' sales effort, 853
——Minor-repairs canvass of customers' equipment, 101
——Motor-business, Soliciting in a city of 20,000, 482
——Motor load established under difficulties in Malheur Valley, Oregon, 150
——Motor load possibilities, 442; By H. W. Cope, 1363
——Motor service, A method of investigating an existing rate schedule for. By F. B. Fletcher, 693
——Motor-service earnings in six Massachusetts central stations, 805
——Motor service, intensive cultivation, Kansas City, 1312
——New business, Discussion, 596
——New business department or each member of the staff a solicitor, 198
——New-business getting. By H. W. Eells, 182
——Noon load, 975
——People's Electrical Page, Cleveland, 643
——Plotting a consumption curve for each customer, 692
——Pocatello, Idaho, 1312
——Postal cards, Meter and key, 198
——Power load, Methods of securing. By L. P. Perry, 52
——Profitable business. By R. B. Mateer, 644
——Progress of 1911, 15
——Publicity Committee of Great Britain. By T. W. Cole, 200
——Quick installation of power service, Mobile, Ala., 149
——Rates (See Charging for electric current)
——Real estate values, Creating, with electric light, 1439
——Relation between the company and the public. By J. W. Ferguson, 1121
——Repair wagons, Dayton, *760
——Rochester, N. Y., Securing interest of architects, 692
——Rural distribution in 1911, 19
——Sales credit schedule for solicitors, 1440
——Seattle, Wash., Model apartment and showroom, *1210
——Signs in San Diego, Cal., 199
——Soliciting on terms of service, not cheapness, 975
——Spokane, Wash., Commercial department of Washington Water Power Co., 1212
——Springfield, Ore., Towns served by Oregon Power Co., 978
——Stamford, Texas, Getting customers acquainted with plant, 1439
——Summer load possibilities, 441
——Toaster campaign, Grand Rapids, Mich., 643
——Wiring. (See Wires and wiring)
——Worcester, Mass., Lighting Campaign, 418, 853
Central-station practice:
——Artificial reactances for turbo-alternators, 2
——Atlantic, Ia., Change from direct to alternating current. By W. E. Byerta, 803
——Balancer set to bring up low battery cells, 1024
——Choice of auxiliary plant. By A. H. Finch, (D.) 813
——Coal premiums and economies in small plant, Iron River, Mich., 43
——Condensers and metallic filament lamps, Ashton system, (D.) 58, 108; By W. P. Maycock, (D.) 205

*Indicates illustrated articles.

Central-station practice: (Continued)
——Consolidation of energy supply systems. By Samuel Insull, 789; comment, 784
——Cost of energy as a function of load. By G. I. Rhodes; comment, 338
——Costs of generation and distribution, San Francisco, 790
——Costs of maintenance, 417
——Costs and operating efficiencies of polyphase and single-phase generating and transmitting systems. By H. M. Hobart, 527
——Cost of production, Fall River, Mass., 746
——Developments of 1911, 8
——Distribution of electricity. By A. D. Brinkerhoff, 947
——Efficiency, Over-all, of generating stations, 909
——Efficiency, Simple methods for increasing. By L. B. Webster, *967
——Efficiency as determined by the technical education of employees. By C. M. Jansky, 1265
——Exhaust steam, Use of. By Max Arbeiter, (D. R.) 982
——Flywheel storage, British patent, (D.) 698
——Gas versus steam. Figures by Carr, (D.) 1446
——Gas engines at Stratford-on-Avon, (D.) *600
——Larger aspect of central-station work, 1141
——Hartford, Conn., and the retirement of President Dunham, *348; Comment, 338
——Hot water supplied from steam-heating condensate, 909
——Ice-making. (See Refrigeration)
——Limiting device for flat rate. By Breitlaender, (D.) 699
——Load curves, Typical. By A. Ludin, (D.) 1078
——Load-factor, diversity-factor and power-factor. By C. M. Wardwell, 1418
——Location of station, Features that govern. By T. H. Reardon, 972
——Massachusetts, Motor-service earnings in six companies, Analysis of, 805
——Oil-burning:
Long Beach plant of Southern California Edison Co., *535; Comment, 522
Wichita, Kan., *1109
——Operating costs of Diesel engine plants, 1121
——Overrating of motor-generator sets to improve power-factor, Detroit, 548
——Power-factor, Relations of, to central-station costs. By F. A. White, 948
——Problems of operation. By C. W. Stone, 1247
——Residence business, Report of N. E. L. A., 1360
——Small plant operation. By R. S. Stewart, 1419
——Steam power and water power, Comparative values. By A. C. Dunham, 38; Comment, 1, 78
——Three-phase supply, Bury, England, (D.) 493
——Tides, Utilizing power of, at Husum. By A. Springe, (D.) 600
——Twenty-four-hour service. By T. Milton, 1359
——Twenty-four-hour service at Exeter, Neb., 1391
Central stations:
——Argentina, in Bahia Blanca, (D.) 764
——Asheville, N. C., North Carolina Electrical Power Co. By N. Buckner, *353
——Atlantic City Electric Co., Turbine-driven station, *735
——Austria, Statistics. By L. Rosenbaum, (D.) 156
——Austria, at Villach, the Gail power plant. By L. Bernard, (D.) 764.
——Austrian State Rys., *1251
——Boston Elevated Railway Co., *637
——Brazil, at Santos. Hydro-electric station of the Cia Docas, *583; comment, 571
——Cleveland Electric Illuminating Co., Lake Shore steam-turbine station, *683; comment, 668
——Cleveland, municipal plant, 449
——Coleman, Cal., Northern California Power Co. By R. W. Van Norden, *237; Comment, 221
——Companies paying percentage of gross receipts to city, 478
——Europe Statistics. By L. Rosenbaum, (D.) 650
——Falmouth, Mass., 691
——Fort Worth, Tex., Improvements, 1072
——French water-power plants. By H. Bresson, (D.) 370
——Germany:
Municipal and corporation control, (D.) 1032
Statistics. By G. Dettmar, (D.) 765

Harmonic analysis, Resonance method of. By R. Beattie, (D.) 1033
Headlights, Metallic-flame arc, *160
Heating, District:
——Discussion. By F. N. Jewett, 853
——Laying out distributing mains of central-station system, 251
——Louisville, Ky., Fetter Lighting & Heating Co., *455
——Report of N. E. L. A., 1377
Heating, Electric:
——Appliance sales in New York, 803
——British cooking and heating apparatus. By Marchand, (D. R.) 699
——Commercial aspects. By M. Moore, 1422
——Discussion. By K. Pflugel, (D. R.) 1032
——Fabric for bandages, pillows, rugs, etc., (D.) *764
——Progress of 1911, 12
——Standardization of apparatus, (D.) 1079
Heating of electrical machinery. By Symons and Walker, (D.) 369, 424; Comment, 390; F. Niethammer, (D.) 1126; (D.) 1218
Helium, Special energy distribution of. By W. W. Coblentz, 365; Comment, 338
Henry, Joseph, Bust of, presented to Associazione Elettrotecnica Italiana, 1098
Heusler alloys, Thermoelectric behavior. By Grondahl and Tarrer, (D.) 206
History of electrical development, 973
Hoists, Electric:
——Coal-wagon hoist, Milwaukee, *746
——Lifting loaded freight cars, St. Louis, 479
Horse-power curves for use with electric meters. By F. S. Root, 474
Hot-well, Indicating, for measuring steam consumption, Wheeler, *867
Hydro-Electric Power Commission (See Ontario)
Hypothenuse of right triangle, Finding, with slide rule. By J. S. Holliday, 46
Hysteresis torque of induction machines. By Dr. Hans Riddervold, 690; Bache-Wüg and Bragstad, 1077

I

Icebergs, Location of, by resistance thermometry. By H. T. Barnes, (D.) 1447
Ice-making (See Refrigeration)
Ice troubles in power plants. By H. T. Barnes, 1420
Illinois Electrical Contractors' Association, 291
Illinois public utilities, Legislative investigation, 133
Illuminating engineering, Progress of 1911, 13, 286
Illuminating Engineering Society:
——Annual meeting, 128
——Chicago section, 178
——New England section, 394, 857
——New York section, 132, 836
Incandescent lamp brackets with universal joints, McCrosky, *327
Incandescent lamp business, Final readjustment of, 444
Incandescent-lamp filaments:
——Graphite, British patent, (D.) 58
——Machine for continuous treatment of tungsten filaments, *100
Incandescent lamp fixtures:
——Benjamin grip, *159
——Benjamin socket, *1222
——Flambeau, Simplex Conduits, *1228
——Folding, Beardslee, *769
——Pass & Seymour, *1402
——Ready-to-hang, Tungstolier, *1278
——Sachs magnetic socket, *771
——Weatherproof unit, Tungstolier, *1224
Incandescent lamp tester, Eldredge, *65
Incandescent lamp-testing board. By H. R. Taunton, (D.) 205
Incandescent lamps:
——Automobile lamps, *162, *760, 772
——Candles-per-watt meter, New form of. By H. E. Ives, *1268
——Development of the modern lamp. By L. J. Lewinson, (D.) 914; J. C. Henninger, 1420
——Evacuating lamp bulbs, Phosphorus process, (D. R.) 914
Incandescent lamps: (Continued)
——Fittings, German standardized, (D. R.) 1218
——Kink to save lamps on series-multiple circuits. By G. Zimmermann, 749
——Melting points of tungsten and tantalum investigated at University of Wisconsin, 390
——Metallic filament:
Applications of. By Marchand, (D.) 650
Changes in filaments during use. By F. J. Brislee, (D.) 1445
Condensers in series with lamps. By A. W. Ashton, (D.) 1445
Disposition of filaments in lamp bulbs, Jahoda patent, (D.) 1445
Investigations on various problems. By P. Le Boeuf, (D.) 698
Progress, (D.) 370, 698
——Multi-color, for advertising purposes, 816
——Odd uses for lamps, 646
——Osram patent suit in Great Britain, (D.) 1319
——Overshooting of metallic-filament. By E. W. Marchant, (D.) 369; E. J. Edwards, 1124
——Pilot lamps for flush switches, *1224
——Prices reduced, 1071
——Progress in, (D.) 266, 981
——Report of N. E. L. A., 1364
——Self-induction. By M. Höchstädter, (D. R.) 58
——Sensitiveness of carbon lamps to static charges, 1216
——Standard lines, 208
——Tantalum:
Melting point, 833
Resistivity. By H. Pecheux, (D.) 321
——Temperature and efficiency of filaments. By W. E. Forsythe, (D.) 1318
——Temperature of filament and specific power consumption. By Pirani and Meyer, (D.) 1127
——Thomson effect in and thermal conductivities of tungsten, tantalum and carbon at glowing temperatures. By A. G. Worthing, (D.) 861
——Tungsten:
Drawn-wire. By F. W. Willcox, (D.) 764
Drawn-wire, Electric properties. By H. Pecheux, (D.) 913
Drawn-wire, Patent of Deutsche Gaslühlicht, (D.) 492
International candle-power measurements, 597
Just and Hanaman patent, 444
Melting points of tungsten, 833
Street lighting. By H. A. Hussey, (D. R.) 1445
Tests of lamps used in New York subway, 857
——Tungsten tube lamp, (D.) 1272
Independent Telephone Association. (See National Independent Telephone Association.)
Indiana public utilities commission, 233, 1299
Indicators, Demand, Investigation in Massachusetts, 231
Inductance, Mutual and self, Formulas and tables for calculations of. By Rosa and Grover, (D.) 863
Induction, Law of. By F. Emde, (D. R.) 862
Induction coils:
——Calculation of protective. By F. Emde, (D.) 764, 914
——With straight iron cores, Calculating. By P. Boucherot, (D. R.) 1221
Inductive reactance of three-phase aerial circuits. By R. S. Brown, 640
Industrial electric power in 1911, 15
Industrial plants, Electricity in:
——Box-making plant, Ashuelot, N. H., *464
——Brick plant, Pueblo, Col., 1312

Smelter fume purification by electrostatic means. By F. G. Cottrell, (D.) *556
Society of Chemical Industry, 882
Sockets, Substitution of porcelain for brass-shell, 263
Solder for aluminum, Brown, 1035
Soldering conductors, Egner patent, (D) 1220
Sons of Jove, 291, 886
South Africa, Import trade, (D.) 1448
Southwestern Electrical and Gas Association, 786, 946
Spark frequency, 1000. By S. Kimura, (D.) 558
Spark-gap apparatus for calibrating instruments. By R. P. Clarkson, *1307
Spark-gap device, Bellini and Tosi patent, (D.) 323
Spark plug and coil combined, Connecticut, *158
Spark potentials, Measurement of, between 20,000 and 300,000 volts. By Villard and Abraham, (D.) 372
Sparking in single-phase commutator motors, Suppression of. By R. Richter, (D.) 108
Specifications in British electrical practice. By F. S. Sells, (D.) 603
Spectra in compound gases. By G. Stead, (D.) 322
Spectra of the electrodeless ring discharge. By H. Donaldson, (D.) 322
Speed dial, Reliance, *495
Speed regulation of motors, Definition of. By H. H. Higbie, 491
Stamping press, Safety device, *60
Standardization rules for dynamo-electric machines, German, (D.) 1126
Standardizing machines. By R. Pohl, (D.) *57
Static frequency duplicator. By G. Vallauri, (D.) *369
Steam:
——Exhaust steam in metallurgical works. By Schömburg, (D.) 1219
——Removing oil from, (D. R.) 370
Steam consumption, Indicating hot-well for measuring, Wheeler, *867
Steam engines:
——Competition with steam turbine, Progress of 1911, 22
——High-speed, uniflow, Browett, Lindley, *818. By J. Davidson, 1125
Steam gages, Care of. J. Jones, 475
Steam meters. By T. Pausert, (D. R.) 1274
Steam outputs, Using superheater coils as Venturi meter to indicate. By M. E. Merwin, *253
Steam power, Value of, compared with water-power. By A. C. Dunham, 38; Comment, 1, 78
Steam power plants in Germany, Statistics. By O. Buehring, (D.) 1218
Steam turbines:
——Bleeder operation of turbines for Adrian, Mich., heating system, *747
——Comparison of commercial economy of gas engines and turbines. By F. M. Farwell, 246
——Condenser for 15,000-kw turbine, Kansas City, *249
——Development. By K. Baumann, (D.) 426
——Exhaust turbine as applied to electric lighting. By W. R. Eaton, 677
——Lake Shore station of Cleveland Electric Illuminating Co., *683; Comment, 668
——Mixed-pressure and low-pressure. By H. F. Bussey, 1298
——Progress of 1911, 22
Steels:
——Carbon, Temperature and magnetic properties. By M. B. Moir, (D.) 427
——Special, Electrical resistivity of. By O. Boudouard, (D.) 372
Steinmetz, Dr. C. P. Address to Boston Luncheon Club, 225
Storage-battery car on Third Avenue R.R. By H. E. Pratt, 181
Storage-battery connector, *653
Storage battery electric-vehicle banquet, 325
Storage battery grids, Marino patent, (D.) 915
Storage battery plates:
——Lake patent, (D.) 766, 1220
——Rapid formation of plates. By G. Schleicher, (D. R.) 699
——Sulphated. By R. G. Lunnon, (D.) 1220
Storage batteries:
——Automobile charging. By T. H. Schoepf, (D. R.) 1395
——Care of. By M. Mayer, 750
——Charging, (D.) 652
——Efficiency. By W. Hibbert, (D.) 207
——Improved methods for care of lead batteries in automobiles. By H. M. Martin, 1316
——Intermittent operation with. By E. Ketzler, (D. R.) 982
——Iron-nickel. By Sharp and Holland, (D. R.) 427
——Largest installation in the world, Baltimore, *1390
——Nickel-iron alkaline, Gouin, *986
——Progress of 1911, 15
——Recovery of sludge from, (D.) 1320
——Status. By H. Beckmann, (D.) 863
——Volume changes in electrodes. By C. Soone, (D.) 863
Stores:
——Stanley electric range, 324
——Thermal storage electrical, *1050
Street lighting:
——Atlantic City Boardwalk lighting, *759
——Changing arc system over to metallic-filament lamps. By H. F. J. Thompson, (D.) 205
——Chicago:
Cost, 403
Flames arcs, 671
Post location, 3
——Costs with present systems, 1216
——Discussion. By J. D. MacKenzie, (D.) 981; D. M. Diggs, 1419
——Discussion at Boston, 858
——Display lighting discussed by Illuminating Engineering Society, 125, 132
——Enid, Okla., *264
Street lighting: (Continued)
——Fargo, N. D., *317
——Flame-arc lighting, Council Bluffs, Ia., 890
——Fort Smith, Ark., 198
——Fort Worth, Tex., Difficulties, *316
——Height of suspension of metallic-filament lamps, 54
——Joliet, Ill., Tungstens, *420
——Louisville, Ky., 803
——Maintenance of ornamental post lamps. By S. M. Gorgas, 860
——Manchester, England, (D.) 698
——New York, Scroll-bracket posts, *54
——Ogden, Utah, *1392
——Ornamental lighting. By H. S. Tonks, 393
——Pasco, Wash., Cluster post system, *695
——Report of N. E. L. A., 1365, 1367; Comment, 1341
——Riverside, Cal., Ornamental posts, *920
——Salt Lake City, Utah, 1312
——Sample lamp operated from truck battery, *755
——Seattle, Wash., *1189, *1213
——Spokane, Wash., *1212
——Symposium, 1151
——Tungsten, Series, with armored cable, Charles City, Ia., 910
——Waupaca controversy, Decision of Commission, 530
Substations:
——Attendantless rotar , Detroit, 589
——Jamestown (N. Y.) Lighting & Power Co. By F. W. Bullock, *409
——Ogden, Utah, *1392
——Piedmont Traction Co., for 1500-volt direct-current service, *1034
——Puget Sound Traction, Light & Power Co., *1161
——Washington Water Power Co., *1425
Switch and cut-out, Chicago fuse combination, *270
Switch boxes:
——Design of wooden. By Harry Burrows, *978
——Home-made iron. By A. G. Trout, *552
Switch columns, Generator and motor. By W. H. Miller, *960
Switch-fuse for pole top, Pacific, *920
Switchboards:
——New type of distributing, for improving consumer's load-factor. By G. R. Grove, *971
——Prudential Insurance Co., *146
——Remote-control, Westinghouse, *1276
——Removable-panel. By W. H. Miller, *960
——Removable-panel ironclad, Electrical Construction Co., *1323
——Small plants, *324
——Three-wire generators, Panels for. By A. M. Bennett, *244
Switches:
——Battery, in gang tandem, Cutler-Hammer, *868
——Breakdown service, Condit, *988
——Cutler-Hammer, *817, *1401
——End-cell, Anderson motor-operated, *496
——Lock-type disconnecting, *1036
——Locked-blade disconnecting, Delta-Star, *158
——Multiple control, J. & J. Electric Co., *1222
——Oil:
Condit, *66
General Electric, *1402
Replacing 2300-volt fuses, Detroit, 552
——Remote-controlled, Condit, *1036
——Rotary, for heating pad, *559
——Single-pole, Use of. By H. G. Clark, *553
Symbols. Electrical, for mine maps, *449

T

Tariff (See Charging for electric current.)
Tariff bill, Cummins, 1050
Tariff on metals and machinery, Proposed revision, 176
Telegraphic cables:
——Frost, (D.) 651
——Submarine telegraph cable theory. By H. W. Malcolm, (D.) 701, 766, 916, 1221, 1448
Telegraph lines:
——Government ownership proposed, 129
——Interference by transmission lines. By Karl Hohage, (D.) 110, 207; Comment, 391
Telegraphy:
——Alternating-current. By A. Maior, (D.) 1081; Bela Gati, (D.) 1081
——Distributed leakage. Methods for measuring resistance of insulation between open wires. By F. F. Fowle, 545; Comment, 523
——Earth potentials, Determining, 752
——Long-distance. By Bela Gati, (D.) 1033
——Progress of 1911, 18
——Relays of different types. By J. Zelisko, (D. R.) 1221
——Ship's apparatus, (D.) 603
——Wired wireless experiments by Squier, 341
——(See also Wireless telegraphy)
Telephone cables:
——Direct distribution underground. By E. D. Pink, (P.) 268
——Fault localization. By E. Giersing, (D.) 603
——Insulation resistance of paper-insulated. By E. Winterer, (D.) 1321
——Loaded, Comparison of Pupin and Krarup cables. By E. F. Petritsch, (D.) 1275, 1448

*Indicates illustrated articles.

Telephone cables (Continued)
——Loaded, Continuously, for French Administration of Posts and Telegraphs, (D.) *766
——Submarine, Anglo-Belgian, with Pupin loading coils, 592; Comment, 573
——Testing. By E. B. Stephenson, (D.) 766
Telephone exchanges:
——Ancillary jack system, London, (D.) *372
——Efficiency of. By Dyrhauge, (D.) 323
——Operating cost. By C. L. van der Bilt, (D.) 864
Telephone lines:
——Interference by transmission lines. By Karl Hohage, (D.) 110, 207; Comment, 391; P. H. Trout, Jr., 554
——Troubles, 49
Telephone patents, 106, 152, 203, 319, 422, 554, 599, 648, 697, 811, 860, 912, 1076, 1124, 1444
——Lorimer-Lundquist, Sale to Western Electric Co., 176, 224
Telephone "trust" and the Sherman law, 177
Telephony:
——Distributer leakage. Methods for measuring resistance of insulation between open wires. By F. F. Fowle, 545; Comment, 523
——Great Britain, Automatic telephony in, *1324
——Microphone for strong currents. By Egner and Holstrom, (D.) *700
——Milwaukee "wayside" telephone service. By F. B. Rodger, *763
——National Independent Telephone Association, Convention, 344
——Phantom circuit, 478
——Progress of 1911, 16
——Semi-automatic telephony. By K. G. Frank, 367
——Squier simultaneous experiments, 291
——Statistics of the world, 1346
——Vibration of diaphragm, 752
——(See also Wireless telephony)
Telescope, Electrical operation of, Mount Wilson Solar Observatory. By H. S. Knowlton, *633; Comment, 669
Temperature and properties of matter. By E. F. Northrup, (D.) 1273
Temperature recorder, Rennert remote-controlled, *64
Terminology, Electrical, Report of N. E. L. A., 1377; Comment, 1413
Terrestrial magnetism. By L. Dunvyer, (D.) 427
Test-board proof against crosses or shorts. By M. C. Rice, *970
Testing laboratory of Bryant Electric Co., *606
Texas public service commission proposed, 892
Thawing water pipes by electricity. By James Francis, 255
——Chicago service, *483
——East River, New York, *641
——Fort Leavenworth, Kan. By J. Parrish, *475
——Norwalk division of United Electric Light & Water Co. By T. T. Logie, *473
——Rochester, N. Y., *481
——Without a transformer. By L. N. Jones, *749
Theater, Electrical equipment, Philadelphia, *272
Thermal insulation of furnace walls. By Carl Hering, (D.) 862
Thermal storage, Bastian patent, (D.) 1395
Thread-rolling machine, Bliss, *767
Tin recovered from scrap by electrolytic process, (D.) 863
Titanic disaster, 879
Toaster, Electric, Simplex, *1035
Tool steels, Purchase of high-speed. By L. M. Cohn, (D.) 652
Towers, Steel, Ontario transmission system, *37, *97
Trade relations in the electrical industry. By P. S. Dodd, 758
Transformer coils, Bridged spark-gaps protect. By L. N. Parshall, *971
Transformer house for small-town distribution, *978
Transformer stations for agricultural purposes, Germany, *326
Transformers:
——Arc lamp, Fort Wayne, *1403
——Banking on secondary side, 49
——Care and operation. By W. M. McConahey, 1353
——Changing cycle frequencies, 973
——Chicago street lighting, *703
——Connecting in series. By William Westerfield, *254
——Core-type, butt-joint, at Duluth, Minn., *1083
——Current, for high-voltage service, Johns-Manville, *987
——Design. By E. G. Reed, (D.) 321
